

# COLLECTING DATA 2

We then migrated the relevant data from Excel into Supabase, an open-source database. Supabase is directly integrated with FlutterFlow, a platform for building mobile and web applications. By moving our data into Supabase, we could seamlessly connect it to the FlutterFlow app we were developing, enabling us to display and interact with the innovation spaces information within our custom application.

| id                                   | uuid | room_name                              | campus   | images                                 | opening times |
